Application Note:

[1] Following SOCs not support the 512Mx8 DDR3 because of the package without Address Input pin A15:  
RK2906-6,RK2906-8,RK3066.

[2]The DRAM Part Number is usually consists of two parts divided by '-', which the first part contains memory type, density, organization, package, and the second part usually means data rate.

[3]RockChip platform can support all the chips that match the first part of Part Number which marks '✓' or 'T/A', and do not need to care the second part. If you want your system running more effective, you may need to find out the exact data rate in DRAM datasheet and config in kernel menuconfig.

[4]Since DDR is high speed device. Please directly copy our PCB DRAM Part Template and follow our PCB product guide.
